## **II. RECENT DEVELOPMENTS IN 2014**

On 17 December 2014, BCP informed on the impact of the non-inclusion by the European Commission of the Republic of Angola in the list of countries with supervisory and regulatory arrangements equivalent to those of the European Union.

Following the publication by the European Commission (“EC”) of the list of countries with supervisory and regulatory arrangements equivalent to those of the European Union (“EU”), in which the Republic of Angola was not included, Banco Comercial Português informed that:

- Risk weighted assets resulting from the consolidated exposure of Banco Comercial Português to the government and central bank of the Republic of Angola totaled EUR 87 million at 30 September 2014. This amount stemmed from applying risk weights as required by the Banco Nacional de Angola (Angola’s central bank) to such exposure;
- The non-inclusion by the EC of the Republic of Angola in the list of countries with supervisory and regulatory arrangements equivalent to those of the EU means that the risk weights in accordance with the capital requirements regulation and directive (“CRR/CRD IV”) have to be applied instead, resulting in an increase of around EUR 560 million in risk weighted assets from 1 January 2015;
- Such an increase would lead to a reduction in BCP’s common equity tier one capital ratio as of September 2014 of 8 basis points for the fully-implemented ratio and 15 basis points for the phased-in ratio;
- This change does not result in the consolidated exposure of Banco Comercial Português to the government and central bank of the Republic of Angola exceeding the large exposures limit.
