### Section B – Issuer

Element	Title	
<b>B.1</b>	Legal and commercial name of the Issuer	Banco Comercial Português, S.A. ("BCP", the "Bank" or the "Issuer")
<b>B.2</b>	Domicile/ legal form/ legislation/ country of incorporation	BCP is a limited liability company incorporated and domiciled in Portugal under the Portuguese Companies Code and Decree-Law No. 298/92 of 31 December ( <i>Regime Geral das Instituições de Crédito e Sociedades Financeiras</i> ) (as amended from time to time, the "Banking Law").
<b>B.4b</b>	Trend information	<p>During the first six months of 2017 the Portuguese banks continued to develop their activities within a challenging environment, in spite of the boost in economic growth. Banks are operating within a context of very low interest rates, exerting pressure on financial margins. Moreover, the Portuguese banks have a significant number of non-interest bearing assets on their balance sheets. The Banco de Portugal's forecasts for the Portuguese economy in the 2017-19 time frame point towards the recovery of economic activity at a quicker pace than in the last few years. Gross Domestic Product ("GDP") is expected to grow on average 2.5% in 2017, 2.0% in 2018 and 1.8% in 2019. At the end of this period, GDP levels are expected to stand slightly above the figures recorded before the world financial crisis began in 2008. In addition, the growth rate throughout the forecast period should be higher than that of the euro area, according to the European Central Bank's ("ECB") forecasts. Currently there are two rating agencies (DBRS and Standard &amp; Poor's) that rate the Portuguese Republic as investment grade. According to the Banco de Portugal, the funding operations made by the Portuguese banks with the ECB fell to EUR 22.3 billion in June 2017, consistent with the general trend since the second half of 2013. These figures show an improvement in the liquidity position of the domestic banks which has benefited from a resilient performance from deposits, namely from individuals. Moreover, the deleveraging of the Portuguese financial sector continues and the total credit to individuals and to companies decreased 4.0% year on year, as of June 2017. Loans granted by Millennium bcp have continued to diminish, in a context of deleveraging of the non-financial sectors of the economy, resulting in a fall in demand for credit. At the same time, deposits also continued to grow despite the fact that the bank let go of some institutional deposits requiring higher remuneration, complying with a policy for the preservation of the financial margin. Over the upcoming months, the expectation is that these trends will continue, and it is highly likely that the credit/deposit ratio will continue to fall, together with the maintenance of funding from the ECB under EUR 4 billion. The maintenance of very low money market interest rates is contributing to the decrease of the spread on term deposits of the Portuguese banks, a trend that persisted in the first half of 2017, more than offsetting the lower spreads for credit. The price effect on the financial margin should continue to be globally positive, reflecting the improvement of the interest margin on operations with customers. Nevertheless, the continued reduction in credit granted (volume effect) will probably continue</p>

Element	Title	
		<p>to condition the financial margin. The Millennium bcp group has a relevant exposure to Poland where there are risks due to legislative amendments that impact the Polish financial system. The plan that has been recently presented to solve the issue of the conversion of loans in Swiss francs in Poland entails a quarterly contribution of 0.5% (2% annually) on the mortgage loans in a foreign currency into a new restructuring fund for a long period of time. The objective is to promote the conversion of the loans into zloty. There are still some risks connected with the economic context experienced by some African countries, with potential impact on the Group, particularly in Angola and in Mozambique, whose economic activity is decelerating and which faced a significant depreciation of their currencies in 2016. The continuous improvement in core income<sup>1</sup> as well as the continuation of the restructuring and reduction of costs should play a positive role and contribute to the improvement of the 2017 results, though conditioned by the economic picture. Management is intensely focused on the stock of problematic assets and respective hedging levels, and measures should be adopted to reduce these assets, together with other preventive measures, to be applied within the scope of prudential supervision and targeted at new Non-Performing Loans so as to foster a more pro-active management of them, including measures to remove the blocking factors in legal, judicial and tax systems. The Bank has an ongoing plan for reducing Non-Performing Exposures to around EUR 7.5 billion at the end of 2017, which compares to EUR 12.8 billion at the end of 2013. It is not yet possible to determine what will be the final impact of the resolution of Banco Espírito Santo, S.A. on Millennium bcp as an institution participating in the resolution fund created by Decree Law No.31-A/2012, of 10 February (“<b>Resolution Fund</b>”) which holds the entire share capital of Novo Banco, S.A. (“<b>Novo Banco</b>”), valued on 31 December 2015 at EUR 4.9 billion (consisting of EUR 3.9 billion financed by a State loan, plus EUR 700 million obtained by loans granted by several banks, with the remainder funds that were already in the Resolution Fund). In March 2017, the conditions for loans granted by the Portuguese state to the Resolution Fund were changed. The maturity of the loans was revised to December 2046, with a view that annual payment due to the lenders is met by the income from the regular contribution charged to the banking sector, keeping the banks' contributions substantially unchanged at their current level and preventing the need to ask the banking sector for special contributions or any other type of extraordinary contribution. On 1 September 2017, BCP announced that, after having conveyed reservations regarding the contingent capitalisation obligation by the Portuguese Resolution Fund which was announced to be included in a sale agreement of Novo Banco, it had decided, in light of the legal deadline and as a precaution, to promote administrative legal proceedings with a view that it is subject to judicial review. This process, which is centred exclusively on the capitalisation obligation referred to above, does not entail the suspension of the sale of Novo Banco, S.A. which was completed on 18 October 2017. Directive No. 2014/59/EU (the “<b>BRRD</b>”) foresees a joint resolution regime in the European Union enabling the authorities to cope with the insolvency of bank institutions. The shareholders and creditors will have to internalise an important part of the costs associated with the insolvency of a bank, minimising taxpayers' costs. To prevent bank institutions from structuring their liabilities in a way which may compromise the efficiency of the bail-in or of other resolution tools and to avoid the contagion risk or a bank run, the BRRD establishes that the institutions will have to comply with a minimum requirement for own funds and eligible liabilities (“<b>MREL</b>”). The MREL regime, which became effective during 2016, involves a transition period and should have implications on the issue of debt by bank institutions, implying the introduction of alterations in the liability structure through the issue of new senior debt with some subordination structure or strengthening Tier 2.</p>

E.4	Interest of natural and legal persons involved in the issue/offer	<p>The relevant Dealers may be paid fees in relation to any issue of Notes under the Programme. Any such Dealer and its affiliates may also have engaged, and may in the future engage, in investment banking and/or commercial banking transactions with, and may perform other services for BCP and its affiliates in the ordinary course of business. In addition, in the ordinary course of their business activities, the Dealers and their affiliates may make or hold a broad array of investments and actively trade debt and equity securities (or related derivative securities) and financial instruments (including bank loans) for their own account and for the accounts of their customers. Such investments and securities activities may involve securities and/or instruments of BCP or its affiliates. Certain of the Dealers or their affiliates that have a lending relationship with BCP routinely hedge their credit exposure to BCP in a way consistent with their customary risk management policies. Typically, such Dealers and their affiliates would hedge such exposure by entering into transactions which consist of either the purchase of credit default swaps or the creation of short positions in securities, including potentially the Notes issued under the Programme. Any such short positions could adversely affect future trading prices of Notes issued under the Programme. The Dealers and their affiliates may also make investment recommendations and/or publish or express independent research views in respect of such securities or financial instruments and may hold, or recommend to clients that they acquire, long and/or short positions in such securities and instruments.</p> <p><b>Issue-specific summary</b></p> <p>[Other than as mentioned above,[ and save for [ ]], so far as the Issuer is aware, no person involved in the issue of the Notes has an interest material to the offer, including conflicting interests.]</p>
